The Colorado Institute for Drug, Device and Diagnostic Development Portfolio Seeks Graduate Interns for the Remaining 2011/2012 Academic Calendar

The Colorado Institute for Drug, Device and Diagnostic Development (CID4) announced that internship opportunities are now available for graduate students pursuing M.S., Ph.D., or MBA degrees and whose concentrations are life science or business focused.

Aurora, CO August 15, 2011 – The Colorado Institute for Drug, Device and Diagnostic Development (CID4), a 501(c)(3) not-for-profit entity focused on advancing the Colorado life science ecosystem through company creation and job growth, announced that it is now seeking graduate student interns for the remaining 2011/2012 academic calendar.

At CID4, graduate interns have an opportunity to be involved in many aspects of business development, implementation and program activities while providing key support to management and staff. Additionally, CID4 interns share responsibilities for administrative tasks that keep the office running smoothly and ensure top quality program support. In a busy professional setting, candidates must be good team players, know how to prioritize tasks and manage their time well. Expect to allocate a minimum of ten-hours per week to your internship.

Under the supervision of senior management, the CID4 graduate intern will assist in the construction of a competitive intelligence virtual library that will function as an important shared resource for the entire Colorado bioscience ecosystem. In addition, assistance with research, due diligence, website development and other development activities are required.

“We look forward to providing an educational and inspiring internship experience to Colorado’s graduate students whose interests and passions intersect at the cross roads of business and bioscience,” said Kevin M. Smith, President and CEO of CID4. “In addition to a unique learning experience, the CID4 interns will be focused upon producing a valuable resource that is certain to be an internal asset and may also benefit the entire Colorado life science ecosystem.”

To receive the application packet, forward your resume to arubenstein@cid4.com. Application deadline for 2011/2012 academic calendar appointments is October 31.

About the Colorado Institute for Drug, Device and Diagnostic Development

Founded in 2009, the Colorado Institute for Drug, Device and Diagnostic Development (CID4) is a 501(c)(3) not-for-profit charitable organization whose mission is to advance the Colorado

FOR IMMEDIATE RELEASE

bioscience ecosystem through company creation and job growth. Active business management and capital work in tandem to help bridge the gap between discovery and product development. CID4 works to identify, fund and actively manage emerging life science technologies. This aim is achieved via an ongoing technology solicitation process augmented by additional deal flow sourcing through networked relationships. Active due diligence is provided by CID4 management in consultation with members of the CID4 Technical and Business Advisory Committee. For more information visit <http://CID4.com>.
